SYSTEM PROTECTION at the CORE!

Give your customers a 30-day complimentary subscription to McAfee VirusScan and Personal Firewall Plus – included with your Phoenix cME Console License.

Easy to Install System Protection
McAfee Security and Phoenix Technologies are teaming up to offer a 30-day complimentary subscription to McAfee VirusScan and McAfee Personal Firewall Plus. Within the Phoenix FirstWare Vault, you will find everything you need to easily distribute virus protection to your customers from within the secure Phoenix cME.

McAfee virusscan 2004 v8.0
McAfee® VirusScan® 8.0 is a powerful anti-virus program for virus protection and removal. VirusScan is used by millions of PC users worldwide to help protect their computers from more than 81,000 known viruses and the 300 new ones discovered every month.

Easy to use and always on guard, VirusScan automatically checks for virus updates and software upgrades (included FREE with the 30-day complimentary subscription and the purchase of one-year coverage), so your customers anti-virus protection is always up-to-the-minute. And it's from McAfee Security, the most trusted name in online security.

McAfee personalfirewallplus 2004 v5.0
Online hackers know more than 2,500 ways to break into naked, unprotected PC systems. In seconds, they steal files, financial statements – even passwords. A perfect complement to anti-virus protection, McAfee® Personal Firewall Plus 5.0 offers advanced protection for your customers – placing a protective barrier between intruders and the information stored on their computer.

Personal Firewall Plus silently monitors Internet traffic for suspicious activities. This firewall not only blocks malicious online behavior but also traces the source of attacks. And it's from McAfee Security, the most trusted name in online security.

System Builder Benefits

Greater System Reliability
Deliver a secure and stable operating environment to your customers.

Higher Value Perception
Customers are well-protected and satisfied – knowing Phoenix FirstWare applications and McAfee Security solutions are built-in.

Lower Operational Costs
Fewer support calls as a result of reduced virus infections on customer PCs.

Highly Available System Protection
The latest built-in anti-virus protection is always available, with automatic updates via the Internet.

System Builder Online Security Portal
Online access to everything you need for successfuly deploying desktop security to your customers.

Ease of Implementation
All you have to do is install the McAfee VirusScan and Personal Firewall Plus Vault PSA and McAfee Security desktop icon.

McAfee Security Handles:
- End-user registration
- Online DAT updates and software upgrades
- Conversion of trial to paid subscription management
- Transaction processing and provisioning

McAfee®
personalfirewallplus 2004 ver. 5.0
always-on protection from hackers

McAfee Personal Firewall Plus provides an easy-to-use interface for managing your computer security.

Customer Benefits

Easily and Always Accessible
Personal Firewall Plus is easy-to-use and can installed from within the cME.

Automatic Updates to Handle New Threats
Notifies users when new updates are available, and gives them the option of immediately downloading and installing them.

Monitor Internet Traffic for Suspicious Activity
Hackerwatch.org provides the ability to obtain detailed information and recommendations on how to respond to a particular event type and also features a "port scan" utility.

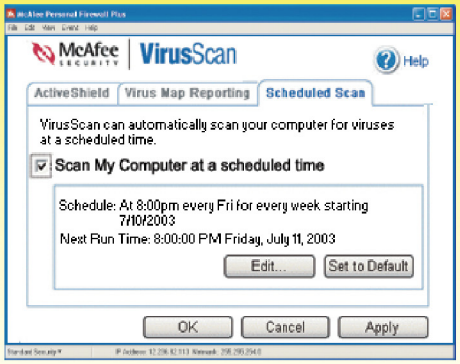
Block Traffic from Unknown Computers or Systems
Intelligent application handling helps guard ports to prevent spyware and Trojans, from installing and hiding on a user's PC, and sending data to a mailicious source.

Enhanced Intrusion Detection System
Intercepts, evaluates, records and provides a clearly labeled list of those events originating from suspicious sources.

Event Tracing
Provides a graphical world map trace feature that traces an event to the apparent source of the attack. Detailed identification information about the originating source is provided.

Setup Assistant
An easy to use setup assistant guides users through the firewall settings with easy-to-understand definitions and explanations.

McAfee®
virusscan® 2004 ver. 8.0
real-time virus protection



Scheduled scanning lets customers choose when VirusScan will scans their PC.

Customer Benefits

Easily and Always Accessible
VirusScan is easy-to-use and can installed from within the cME.

Automatic Scans
Protects PCs, files, and email address books from high-risk, productivity-killing viruses, worms and Trojans.

Spyware Detection Technology
Detects applications like spyware, adware, and web dialers that collect information from a users PC or network without their permission.

Automatic and FREE updates
FREE virus definition updates and product upgrades during a user's complimentary and paid subscription period.

Silent Updating
Provides automatic virus protection by downloading the latest DAT files when users are connected to the Internet.

Email and Instant Message Scanning
Detects and removes viruses, worms, Trojans, and spyware from inbound and outbound email and instant message attachments.

Windows Explorer Integration
Users acces VirusScan directly by selecting files and clicking the VirusScan icon in the Windows Explorer window.

Virus Map and Information Library
Provides users with access to information about the latest threats, diagnostic tools and more.

System Requirements
- Microsoft® Windows® 2000 and XP
- Pentium® 133 MHz or processor or higher
- 32 MB RAM
- 25 MB hard disk space (combined)
- Microsoft® Internet Explorer 5.5 or higher
